

Endogenous Growth, Local Competitiveness and Regional Development: Western Australia's Regional Cities, 2001-2011

Paul Plummer, Matthew Tonts & Kirsten Martinus
Center for Regional Development
School of Earth and Environment

Overview

- *Understanding Local Competitive Advantage*
 - WARCA in the Context of the WA Settlement Hierarchy
 - Albany, Broome, Bunbury, Geraldton-Greenough, Kalgoorlie-Boulder, Port Hedland, Roebourne
- *Accounting for Local Growth Differentials*
 - We have the Data, What are Your Questions?
 - Growth Regressions: Convergence or Divergence?
 - Shift-Share Analysis: Economic Structure or Local Competitiveness
- *Competitiveness and the Implications For Regional Policy*
 - Globalization and Economic Restructuring
 - Endogenous growth and Local Competitiveness

We Have the Data, What Are Your Questions?

- *Oracles: Prophecy is not Evidence*
 - *“It is of the highest importance, therefore, not to have useless facts elbowing out the useful ones”*
- *Sherlock Holmes..... Evidence Based Policy?*
 - *“No data yet.....It is a capital mistake to theorize before you have all the evidence. It biases the judgment”*
- *In Practice, Evidence is Vague, Ambiguous, and Contradictory*
 - *“Such slips are common to all mortals, and the greatest is he who can recognize and repair them”*

Accounting for Economic Structure and Local Competitiveness

$$g_r^t - g_n^t = \sum_{i=1}^N \left(\theta_{ir}^{t-1} - \lambda_{it}^{t-1} \right) g_i^t + \sum_{i=1}^N \theta_{ir}^t \left(g_{ir}^{t-1} - g_i^{t-1} \right)$$

$$\theta_{ir}^{t-1} = \frac{E_{ir}^{t-1}}{\sum_{i=1}^N E_{ir}^{t-1}}$$

Local Industry Employment Share

$$\lambda_i^{t-1} = \frac{E_i^{t-1}}{\sum_{i=1}^N E_i^{t-1}}$$

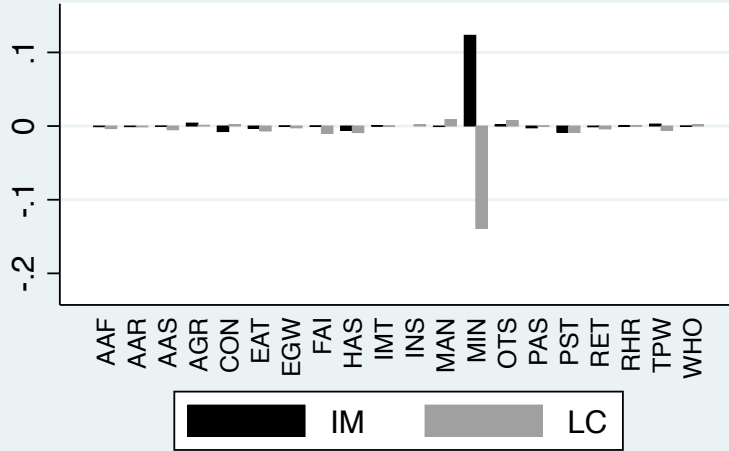

WA Industry Employment Share

Shift-Share Decomposition by Regional City, 2001-2011

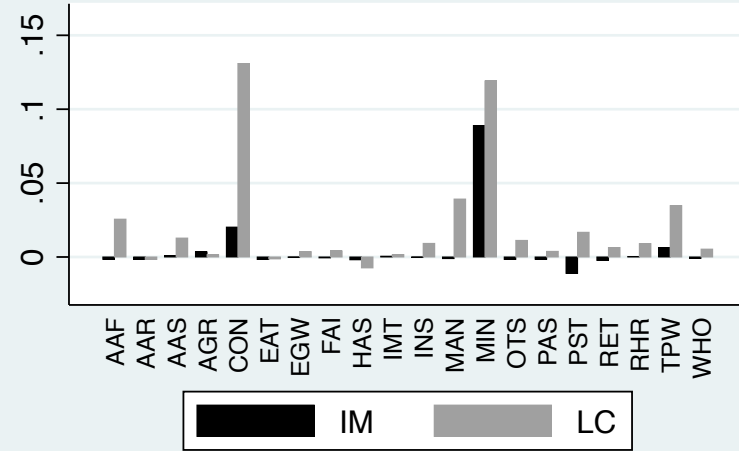

Local Government Area	Employment Growth Rate (g_r)	Difference (A_r)	Industry Mix (IM_r)	Local Competitiveness (LC_r)
<i>2001-2006</i>				
Albany	0.1430	0.0113	-0.0156	0.0270
Broome	0.0526	-0.0790	-0.0035	-0.0756
Bunbury	0.0968	-0.0348	0.0091	-0.0439
Geraldton-Greenough	0.1148	-0.0168	-0.0051	-0.0118
Kalgoorlie-Boulder	0.0179	-0.113	0.0542	-0.1680
Port Hedland	-0.0884	-0.2201	0.0603	-0.2803
Roebourne	0.1646	0.0329	0.0582	-0.0252
<i>2006-2011</i>				
Albany	0.0669	-0.1104	-0.0333	-0.0771
Broome	0.1651	-0.0122	-0.0148	0.0026
Bunbury	0.0629	-0.1144	-0.0049	-0.1096
Geraldton-Greenough	0.1941	0.0169	-0.0031	0.0200
Kalgoorlie-Boulder	0.1061	-0.0712	0.1011	-0.1723
Port Hedland	0.6953	0.5180	0.0939	0.4242
Roebourne	0.6844	0.5071	0.1177	0.3894

Industry Sector Shift-Share Patterns, 2006-2011

Industry Sector Shift-Share Patterns, 2006-2011

ALBANY

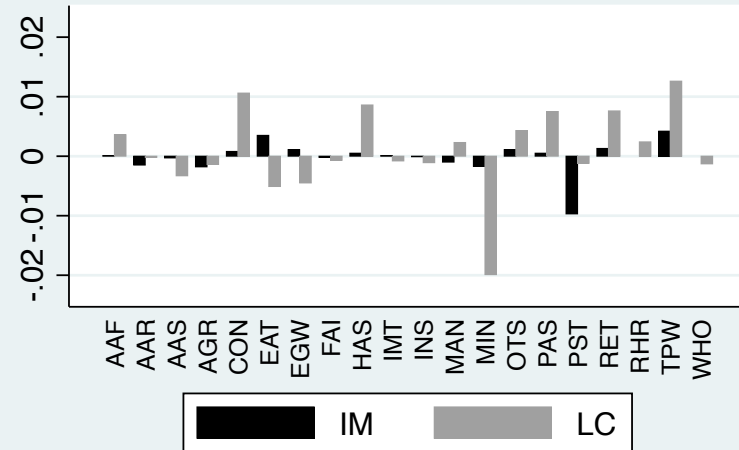

BROOME

BUNBURY

GERALDTON-GREENOUGH

Conclusions and Implications for Regional Policy

- *Understanding Local Competitive Advantage*
 - Widening Gap Between Localities Across Settlement Hierarchy
 - Endogenous Growth: Forging Ahead and Falling Behind
- *Accounting for Local Growth Differentials Across WARCA*
 - Engagement with Broader Socio-Economic Processes Important Drivers of Local Economies
 - Local Competitiveness is Critical in both Allowing Localities to Either Overcome and Unfavourable Mix of Industries or Capitalize on their Industry Structure.
- *Competitiveness and the Implications For Regional Policy*
 - Qualitative Differences Questions ‘One Size Fits All’ Policy Stance
 - Need to Exercise Caution in Focussing Excessively on ‘Competitiveness’
